

## 4<sup>1/2"</sup> - PAPER CONE DRIVER - 100 mm

**CLASSIC SERIES**

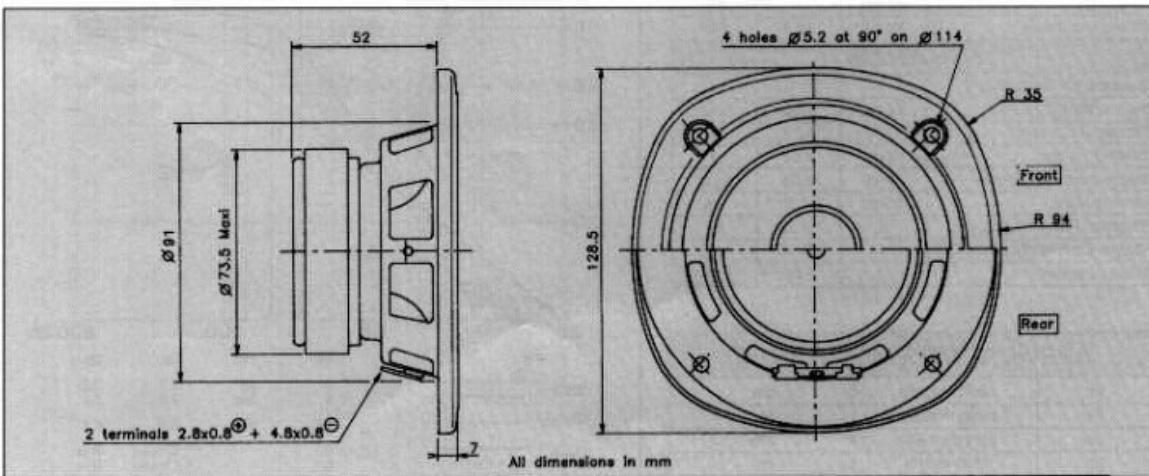

High loss-High compliance rubber surround  
 Coated paper cone  
 Stamped steel chassis  
 High temperature voice coil  
 Aluminium voice coil former  
 Extended bass response (Fs : 75 Hz)

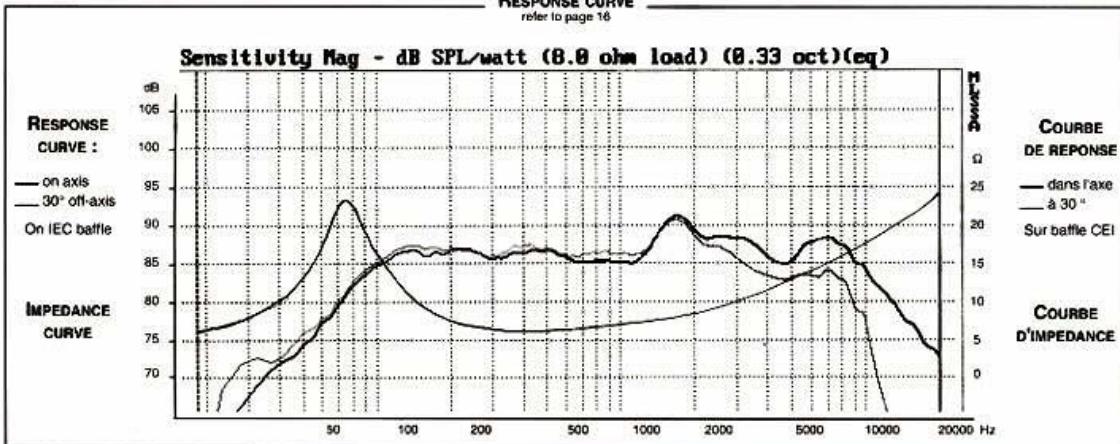

Suspension caoutchouc amortissant h<sup>+</sup> compliance  
 Cone papier traité  
 Chassis acier embouti  
 Bobine haute température  
 Support bobine aluminium  
 Réponse étendue dans le grave (Fs : 75 Hz)

The compact size, low resonance and long throw capabilities of this driver makes it ideal for use in mini-enclosures, satellites systems or as full range driver of high quality. It can also be used as a compact midrange. Featuring a state of the art curvilinear cone, which is critically damped and coupled to a high-loss rubber surround. Special consideration has been taken to ensure a smooth response and roll-off frequency. A newly designed cosmetic ring helps to reduce edge diffraction. The high temperature, 1" voice coil ensures good power handling. The "Suggested applications" charts indicate various driver loads. The response curves shown on the diagram indicate the predicted low end response of the driver in the suggested box volume (Vb) with suggested port (Dp-Lp).

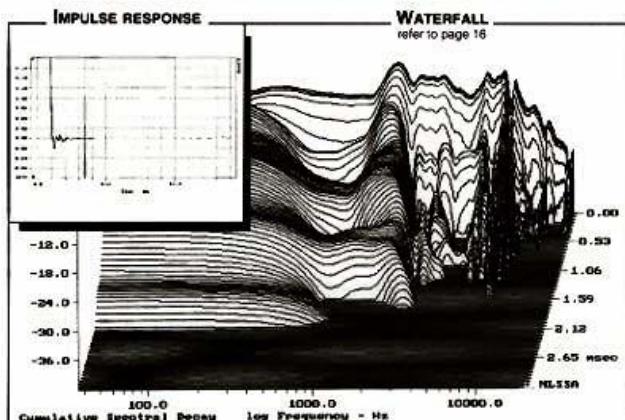

Ce Haut-Parleur très compact combine une bande passante étendue à de réelles possibilités de longues excursions. La résonance extrêmement basse pour sa taille le destine plus particulièrement à de petites enceintes, satellites pour triphonique ou comme médium compact. Il est doté d'un cône en papier traité à profil curviligne associé à une suspension en caoutchouc amortissant haute compliance. Un soin particulier a été apporté à cet ensemble afin d'assurer une réponse en fréquence linéaire ainsi qu'une coupure haute naturelle. Une nouvelle esthétique est également proposée par la présence d'une couronne décorative. La bobine haute température sur support aluminium autorise une puissance admissible importante. Le tableau "Suggested applications" indique différents types de charge. Les courbes publiées correspondent à la réponse dans le grave pour un volume (Vb) et une dimension d'évent donnée (Vp-Lp).
